Joint Multi-TADIL CCB 98-1 Minutes

A. OPENING REMARKS AND INTRODUCTION OF ATTENDEES

The Chairman of the Joint Multi-Tactical Digital Information Link (TADIL) Configuration Control Board (CCB), Lt Col John Lagozzino, United States (US) United States Air Force (USAF), Joint Interoperability and Engineering Organization (JIEO), convened CCB 98-1 at 0830 on 26 January 1998 at Logicon, Inc., Reston, VA.

B. APPROVAL OF THE TADIL CCB 98-1 AGENDA

1. The US Navy (USN), USAF, US Marine Corps (USMC), and JIEO provided additions to the agenda.
2. CCB 98-1 approved the agenda as modified.

C. APPROVAL OF THE MINUTES

1. TADIL CCB 97-3, 18 - 26 September 1997
 - a. TADIL CCB 98-1 deferred the approval of the TADIL CCB 97-3 Minutes.

D. TADIL CCB SUBGROUP REPORTS

1. Configuration Management (CM) Automation Team
 - a. JIEO requested support from the Commanders in Chief (CINCS), Services, and Agencies (C/S/As) for the conversion of the TADIL standards to Word 97. JIEO specifically requested the C/S/As to identify the type of support they could provide, such as personnel working on site in Reston, or at their home facility, or expertise in using Word 97. The C/S/As agreed to provide Points of Contacts with experience in Word 97 by February 13, 1998. The USN stated that it would be able to provide support at Navy locations only.
 - b. The CCB reviewed JIEO's proposed schedule for updating the standards and converting them to Word 97. The update and conversion of the standards will follow a two-step process. First, JIEO will update the WordPerfect (WP) files with all approved Interface Change Proposals (ICPS) that have been issued a Configuration Control Board Directive (CCBD) at the close of CCB 98-1, and those with companion Data Link Change Proposals (DLCPS) moved to Section F at the conclusion of the 15th Data Link Working Group (DLWG). To prevent a lengthy review process, JIEO will provide an errata sheet listing only the discrepancies between the approved ICPs and the data incorporated in the updated standard(s). After the C/S/As have reviewed and approved these changes, then JIEO, with C/S/A support, will convert the standards to Word 97. A copy of the schedule is included as Attachment 1. The

Joint Multi-TADIL CCB 98-1 Minutes

USAF expressed concern about blindly accepting changes that may be made to DLCPS made at the DLWG without a CCB review. The USMC recommended that any DLCPS that fall in this category be addressed in a phone or e-mail vote. The CCB agreed.

- c. The CCB agreed that Military Standards (MIL-STDS) would be updated and converted first followed by North Atlantic Treaty Organization (NATO) Standardization Agreements (STANAGS). The US Army (USA) requested that the Variable Message Format (VMF) Technical Interface Design Plan (TIDP) Test Edition (TE) be distributed in WP as soon as it was updated and postpone the conversion to Word 97 to a later date. Due to contractual obligations, there would be an adverse impact to USA schedules if the VMF reissue is delayed for Word 97 conversion. The CCB agreed.
- d. The USN stated that the CM Automation Team had an action for JIEO to develop procedures for tracking requests for products such as system implementation files. JIEO stated that the action had not been completed. Prior to the completion of the CCB, JIEO provided a draft form to be used for requesting products and tracking product requests, and stated that corresponding procedures would be developed.
- e. JIEO provided a short briefing regarding the status of CDBS and the pending move of the TADIL Web Server from the current Defense Information Systems Agency (DISA) location to a DISA megacenters. JIEO stated that the JIEO Web Server would be one of the last ones moved to minimize the number of problems associated with the move.

2. Report from the International Technical Working Group (ITWG)

JIEO provided a briefing on the status on the ITWG. For all practical purposes, the ITWG is defunct due to lack of business and the cost of travel. Currently, eight NATO nations are involved with ATDL-1 and the NATO Programming Center has stated that they will be willing to coordinate the NATO positions before providing input to the US. JIEO recommended that the ITWG be dissolved and ATDL-1 ICPS be provided to the TADIL CCB either by JIEO or the USMC. There was no objection to the dissolution of the ITWG, and JIEO agreed to research the best method for modifying ATDL-1.

E. 14th DLWG REPORT

- 1. The following DLCPS were withdrawn by the originating nation or by a Multi-national Group (MG) decision of the DLWG. All corresponding ICPS are already CCB disapproved and CCBDS have been issued.

Joint Multi-TADIL CCB 98-1 Minutes

- a. TM92-046Ch3 (032/D4/SHF/M75/R2) - NATO Emitter Data Base. CCB issued at TADIL CCB 95-2.
 - b. TA93-100 (060/L11/SL/M2) - Emitter Spot Number/Platform Reference Number. CCB issued at TADIL CCB 94-2.
2. The DLWG approved the following DLCPS for movement into Section F (repository for DLCPS to be included in the next amendment or change of the baseline, STANAG, or Allied Data Publication (ADATP)) or Section E (approved for coordinated implementation), as noted, of the appropriate supplement. JIEO will issue CCBDS for the following ICPS.
- a. TA91-066Ch1 (086/L11/US/M10/R1) - M.10A Double Forwarding.
 - b. TS91-108Ch3 (009/5601/SHN/M90/R4) - Neutralized Faker.
 - c. TM93-082Ch11 (076/L11/US/M5/R6, 045/P11/UK/M8/R4, 497/L16/UK/M1/R6, 058/P16/UK/M8/R4) - Use of SPI.
 - d. TA93-086Ch4 (027/P11/US/M4/R2) - Proposed Change to ADATP-11 SOP.
 - e. TJ93-096Ch9 (514/L16/US/M3/R4, 047/5616/US/M3/R1) - Ballistic Missile Defense.
 - f. TM94-005Ch10 (075/L11/US/M5/R6, 526/L16/US/M5/R5, 055/5616/US/M5/R3) - Identity Difference Resolution Procedures. DLCP 075/L11/R6 was moved to Section E, all other DLCPS were moved to Section F.
 - g. TJ94-054Ch3 (559/L16/US/M9/R2) - Transmission of Wingman ID Letter.
 - h. TJ95-020Ch4 (534/L16/UK/M6/R3) - Airfield Status Message Revision. Moved to Section E.
 - i. TA95-055Ch4 (091/L11/US/M10/R2) - Addition of Single-Tone Link Eleven Waveform (SLEW) to STANAG 5511, Ed3.
 - j. TD95-059Ch1 (029/4175/US/M5/R1) - Primary Track Address in J0.X Messages.
 - k. TD95-066 (048/4175/UK/M5) - Processing of Action, Communications Control.
 - l. TJ96-058Ch1 (577/L16/US/M11/R1, 074/5616/US/M11/R1) - Editorial and Administrative Corrections.
 - m. TF96-061 (003/L22/UK/M9/R1) - Network Participation Status Indicator.
 - n. TF96-063Ch2 (006/L22/SL/M10/R1) - Minimum Wait Before Transmitting Tracks.

Joint Multi-TADIL CCB 98-1 Minutes

- o. TF96-064Ch2 (007/L22/SL/M10/R1) - Change to PLI/Track Update Rates.
 - p. TJ96-067Ch2 (064/P16/UK/M11/R2) - National/NATO MIDS Units Functional Overview.
 - q. TJ96-068Ch1 (065/P16/UK/M11/R2) - National MIDS System Description.
 - r. TJ96-075Ch1 (564/L16/UK/M10) - Word Sequences for the J3.7 Message.
 - s. TJ96-077Ch1 (566/L16/UK/M10/R1) - Word Sequence for the J14.2 Message.
 - t. TA96-094Ch1 (111/L11/US/M12/R1) - Mandatory Reception of M.9A (AC=6).
 - u. TJ97-001 (591/L16/US/M12) - J12.6 Sensor Channel/Code DFI/DUI Definitions.
 - v. TF97-011Ch2 (008/L22/SL/M11/R1) - Editorial Corrections to STANAG 5522.
 - w. TF97-012Ch1 (009/L22/SL/M11/R1) - Replacing the F03.1 Message with the FJ3.1 Message.
 - x. TF97-015 (012/L22/GE/M12/R1) - Explanation for Jamming State.
 - y. TJ97-023 (075/P16/US/M14) - Updated Ownership Codes for the Network Naming Convention.
 - z. TS97-029Ch1 (017/5601/SHN/M12/R1) - Expansion of Order Originating Site Codes in Link 1.
 - aa. TJ97-042 (587/L16/UK/M12) - J7.0 MIN IMP for NONC2 JUS.
 - bb. TS97-058 Ch1 (007/P12/SL/M13/R2) - Standard Operating Procedures for the Ship-Shore-Ship Buffer.
 - cc. TJ97-182 (079/P16/UK/M14) - NATO Network Request Form.
 - dd. TJ97-183 (078/P16/UK/M14) - Broadcast Cease Fire.
 - ee. TS97-184 (019/5601/UK/M14) - Correction of Link 11 Identity to Link 14 Amplification Conversion Table.
 - ff. NO ICP (007/L14/UK/M14) - Deletion of Duplicate Link 11 to Link 14 Conversions.
3. The following National Implementation ADATP DLCPS moved to Section F of the appropriate supplement. They require no CCB action and are provided for information only.

Joint Multi-TADIL CCB 98-1 Minutes

- a. 002/P4/US/M14 (TC97-104) - E-3B/C ADATP-4 Implementation Update.
- b. 063/P11/US/M14 (TA97-103) - ADATP-11A, Changes to USN System Implementation.

F. IMPLEMENTATION ICPS

JIEO received the following implementation ICP for incorporation and will issue a CCBD.

TA97-178 (NO DLCP) - FFG-7 TADIL A Implementation Update.

G. 1990 Through 1993 ICPS

1. TM90-043Ch6 (467/L16/US/M88/R4, 028/L11/US/M79/R3, 079/5616/US/M13, 073/D4/US/M97/R2, 014/L22/US/M13/R1) - Scan Characteristics/Type.

The USN moved to approve this ICP as modified, and the USMC seconded the motion. TADIL CCB 98-1 unanimously approved TM90-043 Ch7. Allied coordination is required; JIEO will initiate the appropriate action.

2. TM92-047Ch11 (053/L11/US/M1/R6, 503/L16/US/M1/R2, 028/5616/US/M1/R4, 034/P11/US/M5/R1, 059/P16/UK/M8/R1) - Forwarding Simulated Data.

The USN moved to approve this ICP as modified, and the USMC seconded the motion. TADIL CCB 98-1 unanimously approved TM92-047 Ch12. Allied coordination is required; JIEO will initiate the appropriate action.

3. TA92-063Ch2 (NO DLCP) - Neutral ID Conflict Resolution.

The USMC moved to approve this ICP as modified, and the USA seconded the motion. TADIL CCB 98-1 approved TA92-063 Ch3 by a vote of 5-1; the USA voted no. Allied coordination is required; JIEO will initiate the appropriate action.

4. TM93-003Ch9 (506/L16/US/M2/R5, 035/5616/US/M2/R7, 063/L11/US/M2/R4) - Friendly Weapon Danger Area.

The USN moved to approve this ICP as modified, and the USMC seconded the motion. TADIL CCB 98-1 unanimously approved TM93-003 Ch10. Allied coordination has been completed; JIEO will issue a CCBD.

Joint Multi-TADIL CCB 98-1 Minutes

5. TM93-015Ch13 (065/L11/US/M3/R9, 507/L16/US/M3/R3, 089/D4/UK/M14) - Change Data Order Protocols.

The USN moved to approve this ICP as modified, and the USMC seconded the motion. TADIL CCB 98-1 unanimously approved TM93-015 Ch14. Allied coordination is required; JIEO will initiate the appropriate action.

6. TM93-054Ch9 (513/L16/US/R6, 044/5616/US/R1) - Air Support Operations.

No action was required on TM93-054 Ch9 by TADIL CCB 98-1.

7. TM93-089Ch7 (093/L11/US/M10/R2, 544/L16/US/M7/R2, 069/5616/US/M10) - Bearing Report Types 0 and 3.

The USN moved to approve this ICP as modified, and the USMC seconded the motion. TADIL CCB 98-1 unanimously approved TM93-089 Ch8. Allied coordination is required; JIEO will initiate the appropriate action.

8. TJ93-091Ch5 (543/L16/US/M7/R2, 055/P16/US/M7/R1) - Track Number Block Allocation and Assignment.

The USN moved to approve this ICP as modified, and the USMC seconded the motion. TADIL CCB 98-1 approved TJ93-091 Ch6 by a vote of 5-1; the USA voted no. Allied coordination is required; JIEO will initiate the appropriate action.

9. TA93-102Ch2 (121/L11/NO/M14) - NATO Free-Format Text Message.

The CCB agreed to replace the ICP in its entirety with the Norwegian comments, which were distributed as TA98-007 (see paragraph K.1). TADIL CCB 98-1 deferred TA93-102 Ch3 for staffing.

10. TJ93-104Ch3 (547/L16/US/M7/R1) - "Reset to No Statement" Rules.

The USN moved to approve this ICP as modified, and the USMC seconded the motion. TADIL CCB 98-1 unanimously approved TJ93-104 Ch4. Allied coordination is required; JIEO will initiate the appropriate action.

H. 1994 and 1995 ICPS

1. TM94-005Ch9 (075/L11/US/M5/R6, 526/L16/US/M5/R5, 055/5616/US/M5/R3) - Identity Difference Resolution Procedures.

- a. The DLWG approved DLCP 075/L11 for movement into Section E, Coordinated Implementation Required (CIR), all the other DLCPS were moved into Section F, Coordinated Implementation Not Required (CINR). The US implementation date for the

Joint Multi-TADIL CCB 98-1 Minutes

DLCPs is December 1998. The CCB approved the ICP for implementation, in the US only, as CINR.

- b. The USN moved to approve this ICP as modified, and the USMC seconded the motion. TADIL CCB 98-1 unanimously approved TM94-005 Ch10. Allied coordination has been completed; JIEO will issue a CCB.

- 2. TJ94-030Ch4 (562/L16/US/M10/R2, 070/5616/US/M10) - Specific Type in Surveillance Messages.

The USN moved to approve this ICP as modified, and the USAF seconded the motion. TADIL CCB 98-1 unanimously approved TJ94-030 Ch5. Allied coordination has been completed; JIEO will issue a CCB.

- 3. TM94-031Ch5 (096/L11/US/M10/R1, 574/L16/US/M10/R2, 072/5616/US/M10) - SAM/SSM Weapon Types.

The USN moved to approve this ICP as modified, and the USMC seconded the motion. TADIL CCB 98-1 unanimously approved TM94-031 Ch6. Allied coordination is required; JIEO will initiate the appropriate action.

- 4. TM94-040Ch2 (097/L11/US/M10, 569/L16/US/M10) - Mode Clear Corrections.

The USAF moved to approve this ICP as modified, and the USN seconded the motion. TADIL CCB 98-1 unanimously approved TM94-040 Ch3. Allied coordination is required; JIEO will initiate the appropriate action.

- 5. TJ94-052 (NO DLCP) - J12.0 Enhancements.

TADIL CCB 98-1 deferred TJ94-052 Ch1 for staffing.

- 6. TM94-053Ch6 (536/L16/US/M6/R3, 086/D4/US/M9/R2, 081/L11/US/M6/R2) - Mode IV Conflict Processing Deletion.

The USN moved to approve this ICP as modified, and the USAF seconded the motion. TADIL CCB 98-1 unanimously approved TM94-053 Ch7. Allied coordination is required; JIEO will initiate the appropriate action.

- 7. TM94-055Ch1 (600/L16/US/M14, 114/L11/US/M14, 082/5616/US/M14) - ATDL Deletion from M.9E/J7.4.

The USMC moved to approve this ICP as modified, and the USN seconded the motion. TADIL CCB 98-1 unanimously approved TM94-055 Ch2. Allied coordination is required; JIEO will initiate the appropriate action.

Joint Multi-TADIL CCB 98-1 Minutes

8. TJ94-081Ch1 (051/P16/UK/M5/R1) - Network Control Procedures.

The USN moved to approve this ICP as modified, and the USMC seconded the motion. TADIL CCB 98-1 unanimously approved TJ94-081 Ch2. Allied coordination is required; JIEO will initiate the appropriate action.

9. TJ95-013Ch4 (576/L16/US/M11/R3, 084/5616/US/M11) - PLAD Meaning and Use.

a. The CCB agreed that this ICP should be implemented by US systems as modified at CCB 98-1. Any more changes proposed by the DLWG will be developed into a new ICP.

b. The USMC moved to approve this ICP as modified, and the USAF seconded the motion. TADIL CCB 98-1 unanimously approved TJ95-013 Ch5. JIEO will issue a CCBD.

10. TJ95-016Ch4 (529/L16/UK/M5/R1) - Interpretation of Filters.

TADIL CCB 98-1 deferred TJ95-016 Ch4 for discussion of illegal filters at the US-United Kingdom (UK) Bilateral meeting.

11. TM95-039Ch6 (099/L11/US/M11, 073/5616/US/M12) - Ballistic Missile Defense (TADIL A).

a. The CCB agreed to approve this ICP for incorporation in US standards only and to withdraw the companion DLCPS at the 15th DLWG.

b. The USAF moved to approve this ICP as written, and the USMC seconded the motion. TADIL CCB 98-1 approved TM95-039 Ch6 by a vote of 5-1; the USN voted no. JIEO will issue a CCBD.

12. TM95-040Ch3 (107/L11/US/M12, 588/L16/US/M12) - Terminate Redundant M.10/M.15.

No action was required on TM95-040 Ch3 by TADIL CCB 98-1.

13. TM95-044Ch4 (095/L11/US/M10/R2, 563/L16/US/M10, 071/5616/US/M10/R1) - Torpedo Reporting.

The USN moved to approve this ICP as modified, and the CINC Bloc seconded the motion. TADIL CCB 98-1 unanimously approved TM95-044 Ch5. Allied coordination is required; JIEO will initiate the appropriate action.

14. TD95-060 (032/4175/US/M5/R1) - Receive Over Receive Time Slot Assignments.

The USAF moved to approve this ICP as written, and the USN seconded the motion. TADIL CCB 98-1 unanimously disapproved TD95-060 Ch1. Allied coordination is required; JIEO will initiate the appropriate action.

Joint Multi-TADIL CCB 98-1 Minutes

15. TD95-063 (045/4175/US/M5) - Electromagnetic Compatibility.

TADIL CCB 98-1 deferred TD95-063 pending USN/PMW-159 review of STANAG 4175, Edition 2 Annexes A and B (excluding the NATO SECRET supplement) for possible declassification (see paragraph L.8, AI98-1/3).

I. 1996 ICPS

1. TM96-023Ch2 (085/L11/GE/M9/R2, 558/L16/GE/M9/R2, 087/D4/SHF/M11) - NAT/ALL Values Update.

The CINC Bloc moved to approve this ICP as written, and the USN seconded the motion. TADIL CCB 98-1 disapproved TM96-023 Ch2; the CINC Bloc abstained. Allied coordination is required; JIEO will initiate the appropriate action.

2. TM96-040Ch2 (575/L16/US/M11, 101/L11/US/M11) - Weapon Type Change.

TADIL CCB 98-1 deferred TM96-040 Ch3 for staffing by the USN.

3. TM96-047Ch3 (108/L11/US/M12/R1, 076/5616/US/M12/R1, 018/5601/US/M14) - Delete MIL TRAINING/BEE.

The USMC moved to approve this ICP as written, and the USAF seconded the motion. TADIL CCB 98-1 unanimously disapproved TM96-047 Ch3. Allied coordination is required; JIEO will initiate the appropriate action.

4. TM96-051Ch2 (601/L16/US/M14, 115/L11/US/M14) - Variable Track Quality.

The USN moved to approve this ICP as modified, and the USMC seconded the motion. TADIL CCB 98-1 approved TM96-051 Ch3 by a vote of 5-1; the USA voted no. Allied coordination is required; JIEO will initiate the appropriate action.

5. TA96-053Ch2 (110/L11/US/M12, 060/P11/US/M12, 112/L11/NL/M12) - M.15 Command Values 12-19 ASW Restrictions.

The USN moved to approve this ICP as modified, and the USMC seconded the motion. TADIL CCB 98-1 unanimously approved TA96-053 Ch3. Allied coordination is required; JIEO will initiate the appropriate action.

6. TA96-074Ch3 (052/P11/UK/M10/R1) - IFF/SIF Data Management Procedures.

The USN moved to approve this ICP as modified, and the USMC seconded the motion. TADIL CCB 98-1 unanimously approved TA96-074 Ch4. Allied coordination is required; JIEO will initiate the appropriate action.

Joint Multi-TADIL CCB 98-1 Minutes

7. TM96-079Ch3 (568/L16/UK/M10/R1) - Editorial Corrections to STANAG 5516.

The USN moved to approve this ICP as modified, and the USAF seconded the motion. TADIL CCB 98-1 unanimously approved TM96-079 Ch4. Allied coordination is required; JIEO will initiate the appropriate action.

8. TM96-081 (NO DLCP) - Forwarding Rules.

The USA and the USN requested that the ICP be deferred. The USAF requested a straw vote to determine if the CCB would permit deferral. The USAF and USMC voted against deferral, the NSA, USA, and USN voted for deferral and the CINC Bloc abstained. The USMC requested that its evaluation be accepted as Change 1. TADIL CCB 98-1 deferred TM96-081 Ch1 for staffing.

9. TA96-091 (051/P11/UK/M10/R2) - Link 11B Standard Operating Procedures.

- a. The JIEO evaluation, which contained Revision 2, was accepted and deferred by the CCB. The ICP title was changed to "Link 11/11B Standard Operating Procedures." The USMC and JIEO provided comments that will be used as DCS to the UK. The USN recommended that the US move slowly on this ICP/DLCP because of the pending presentation of the JMTOP to the DLWG as a multilink Standard Operating Procedures (SOP). The US delegate will recommend to the DLWG that the Link Management Codes be moved back to an appendix and then the main body of the SOP could be declassified.

- b. TADIL CCB 98-1 deferred TA96-091 Ch1 for staffing.

10. TA96-098 (NO DLCP) - NTN TX Upon R2 Shift.

The USMC moved to approve this ICP as modified, and the USAF seconded the motion. TADIL CCB 98-1 unanimously approved TA96-098 Ch1. Allied coordination is required; JIEO will initiate the appropriate action.

J. 1997 ICPS

1. TJ97-004Ch1 (604/L16/US/M14, 083/5616/US/M14) - Land Platform and Platform Activity Additions.

- a. The CCB determined that this ICP required Link 22 pages, which the USN agreed to provide. The CCB redesignated the ICP as TM97-004.

- b. The USAF moved to approve this ICP as modified, and the NSA seconded the motion. TADIL CCB 98-1 unanimously approved TM97-004 Ch2. Allied coordination is required; JIEO will initiate the appropriate action.

Joint Multi-TADIL CCB 98-1 Minutes

2. TJ97-006 (NO DLCP) - J10.2 to NPG 7.
 - a. The USAF requested that the ICP be approved in the US only until NATO resolves the placement of the NPG applicability table (reference ICP TJ97-032/DLCP 552/L16/US/M10/R1). The USN recommended approving the ICP and delaying the development of the DLCPS until the DLCP 522/L16/US/M10/R1 issues are resolved. The USAF agreed.
 - b. TADIL CCB 98-1 deferred TJ97-006 Ch1 for staffing.
3. TA97-008 (104/L11/FR/M11/R1, 062/P11/FR/M12/R1) - OTHT Implementation.

No action was required on TA97-008 by TADIL CCB 98-1.
4. TA97-009 (105/L11/FR/M11/R1, 065/P11/FR/M14, 080/P16/FR/M14) - Data Forwarding of JU Which TN Is Greater Than or Equal to 200 Octal.

No action was required on TA97-009 by TADIL CCB 98-1.
5. TJ97-010 (579/L16/UK/M11) - TN Continuity.
 - a. The JIEO evaluation, which changes the implementation of the ICP to CINR, was accepted as Change 1. The USN requested that the C/S/As review its evaluation as an alternative solution.
 - b. TADIL CCB 98-1 deferred TJ97-010 Ch1 for staffing.
6. TF97-014Ch2 (010/L22/US/M12) - Replacing the F03.0 Message with the FJ3.0.
 - a. The USN evaluation, which replaced the Link 22 Minimum Implementation (MIN IMP) pages, was accepted as Change 3. The USAF requested that the US delegate state to the DLWG that approval of this ICP does not constitute approval of the same changes to Link 16 MIN IMP. The CCB agreed.
 - b. The USN moved to approve this ICP as modified, and the USAF seconded the motion. TADIL CCB 98-1 approved TF97-014 Ch3 by a vote of 5-0; the USA abstained. Allied coordination is required; JIEO will initiate the appropriate action.
7. TJ97-020Ch1 (597/L16/US/M13, 080/5616/US/M13) - Text Addition to J7.3.

The USAF moved to approve this ICP as modified, and the USMC seconded the motion. TADIL CCB 98-1 approved TJ97-020 Ch2 by a vote of 5-0; the USA abstained. Allied coordination is required; JIEO will initiate the appropriate action.

Joint Multi-TADIL CCB 98-1 Minutes

8. TM97-021Ch1 (605/L16/US/M14, 118/L11/US/M14, 020/L22/US/M14) - IFF/SIF Validity and Current Criteria.

The USN moved to approve this ICP as modified, and the USAF seconded the motion. TADIL CCB 98-1 unanimously approved TM97-021 Ch2. Allied coordination is required; JIEO will initiate the appropriate action.

9. TA97-027 (057/P11/NL/M12) - Readability of Appendices 17, 18, & 19 to Annex C for the Operator.

The USAF moved to approve this ICP as written, and the USMC seconded the motion. TADIL CCB 98-1 unanimously approved TA97-027. Allied coordination is required; JIEO will initiate the appropriate action.

10. TF97-028 (013/L22/SL/M12) - NS Equivalent Zero.

The USAF moved to approve this ICP as written, and the USMC seconded the motion. TADIL CCB 98-1 disapproved TF97-028; the USA abstained. Allied coordination is required; JIEO will initiate the appropriate action.

11. TJ97-031 (001/NET/UK/M12) - Link 16 Network Identifier.

a. The USAF questioned why the term "Spare" was defined as an alphanumeric. The JIEO evaluation was accepted as Change 1. The USN recommended that the C/S/As forward Change 1 to their Net Management Working Group (NMWG) representatives for review.

b. The USN moved to approve this ICP as modified, and the USMC seconded the motion. TADIL CCB 98-1 unanimously approved TJ97-031 Ch1. Allied coordination is required; JIEO will initiate the appropriate action.

12. TJ97-032 (552/L16/US/M8/R1) - Delete MIL-STD-6016 NPG Default Table

No action was required on TJ97-032 by TADIL CCB 98-1.

13. TM97-034Ch1 (NO DLCP) - Non-C² Origination of J2.0 Indirect PPLIs.

The USN moved to approve this ICP as modified, and the USMC seconded the motion. TADIL CCB 98-1 unanimously approved TM97-034 Ch2. Allied coordination is required; JIEO will initiate the appropriate action.

14. TJ97-037 (581/L16/FR/M12) - Route Establishment Message J1.2.

a. This ICP is associated with TJ97-038 and TJ97-039. The FR responses to US DCS US/C/M14-581(& 582 & 583)/L16 were provided to the MIDS IPO, which stated that the FR responses were adequate. The USAF expressed concern that the FR were proposing changes to messages outside the J1 messages in

Joint Multi-TADIL CCB 98-1 Minutes

support of needlines. The USAF would prefer that any message changes required to support needlines be confined to the J1 messages based on the briefing provided by the FR at the DLWG.

- b. The USA moved to approve this ICP as written, and the USN seconded the motion. TADIL CCB 98-1 approved TJ97-037 by a vote of 1-0; the CINC Bloc, NSA, USA, USAF, and USMC abstained. Allied coordination is required; JIEO will initiate the appropriate action.
- 15. TJ97-038 (582/L16/FR/M12) - Set Management Word.
 - a. See discussion for TJ97-037.
 - b. TADIL CCB 98-1 deferred TJ97-038 for staffing.
 - 16. TJ97-039 (583/L16/FR/M12) - Repromulgation Relay Filtering Control.
 - a. See discussion for TJ97-037.
 - b. TADIL CCB 98-1 deferred TJ97-039 for staffing.
 - 17. TJ97-040 (585/L16/UK/M12) - Group Mission Assignment.
 - a. The USN evaluation contained questions from its fighter community concerning the impact of Air Control Revisions on this ICP. France (FR) has questions regarding US concept of operations that have to be answered. This ICP and the USN evaluation will be added to the US-UK Bilateral agenda.
 - b. TADIL CCB 98-1 deferred TJ97-040 Ch1 for staffing by the USN.
 - 18. TJ97-041 (586/L16/UK/M12) - Transmission of J12.6E0 Word with Each Update.

The USN moved to approve this ICP as modified, and the USAF seconded the motion. TADIL CCB 98-1 approved TJ97-041; the USA abstained. Allied coordination is required; JIEO will initiate the appropriate action.
 - 19. TV97-049Ch1 (NO DLCP) - Platform Description Message.

The USN moved to approve this ICP as modified, and the USMC seconded the motion. TADIL CCB 98-1 approved TV97-049 Ch2 by a vote of 2-1; the USA voted no; the USAF abstained and the CINC Bloc and NSA were absent. Allied coordination is not required; JIEO will issue a CCBD.
 - 20. TV97-050 (NO DLCP) - Maritime Visual Contact Report.

The USN moved to approve this ICP as written, and the USAF seconded the motion. TADIL CCB 98-1 disapproved TV97-050 by a

Joint Multi-TADIL CCB 98-1 Minutes

vote of 2-1; the USN voted yes; the USAF abstained and the CINC Bloc and NSA were absent. Allied coordination is not required; JIEO will issue a CCBD.

21. TS97-058 (007/P12/SL/M13/R2) - Standard Operating Procedures for the Ship-Shore-Ship Buffer.

The USN moved to approve this ICP as modified, and the USMC seconded the motion. TADIL CCB 98-1 approved TS97-058 Ch1; the USA and USAF abstained. Allied coordination has been completed; JIEO will issue a CCBD.

22. TA97-059 (NO DLCP) - Data Source Amplification.

The USMC moved to approve this ICP as modified, and the USN seconded the motion. TADIL CCB 98-1 unanimously approved TA97-059 Ch1. Allied coordination is required; JIEO will initiate the appropriate action.

23. TA97-060 (NO DLCP) - TN/Address Definition.

The USMC moved to approve this ICP as modified, and the USN seconded the motion. TADIL CCB 98-1 unanimously approved TA97-060 Ch1. Allied coordination is required; JIEO will initiate the appropriate action.

24. TA97-061 (NO DLCP) - Reinitialization of TADIL B.

The USMC moved to approve this ICP as modified, and the USN seconded the motion. TADIL CCB 98-1 unanimously approved TA97-061 Ch1. Allied coordination is required; JIEO will initiate the appropriate action.

25. TA97-062 (NO DLCP) - M.11D Type Report.

The USMC moved to approve this ICP as modified, and the USN seconded the motion. TADIL CCB 98-1 unanimously approved TA97-062 Ch1. Allied coordination is required; JIEO will initiate the appropriate action.

26. TA97-063 (NO DLCP) - Forwarding the M.11D Message.

The USMC moved to approve this ICP as modified, and the USN seconded the motion. TADIL CCB 98-1 unanimously approved TA97-063 Ch1. Allied coordination is required; JIEO will initiate the appropriate action.

27. TA97-064 (NO DLCP) - Terminate Control Message.

The USMC moved to approve this ICP as modified, and the USN seconded the motion. TADIL CCB 98-1 unanimously approved TA97-064 Ch1. Allied coordination is required; JIEO will initiate the appropriate action.

Joint Multi-TADIL CCB 98-1 Minutes

28. TA97-065 (NO DLCP) - Termination of Pairing.

The USMC moved to approve this ICP as modified, and the USN seconded the motion. TADIL CCB 98-1 unanimously approved TA97-065 Ch1. Allied coordination is required; JIEO will initiate the appropriate action.

29. TA97-066 (NO DLCP) - M.81 TADIL A Transmit Rule.

The USMC moved to approve this ICP as modified, and the USN seconded the motion. TADIL CCB 98-1 unanimously approved TA97-066 Ch1. Allied coordination is required; JIEO will initiate the appropriate action.

30. TA97-067 (NO DLCP) - M.9A TADIL B Transmit Rule.

The USMC moved to approve this ICP as modified, and the USN seconded the motion. TADIL CCB 98-1 unanimously approved TA97-067 Ch1. Allied coordination is required; JIEO will initiate the appropriate action.

31. TA97-068 (NO DLCP) - M.11B Transmit Rules.

The USMC moved to approve this ICP as modified, and the USN seconded the motion. TADIL CCB 98-1 unanimously approved TA97-068 Ch1. Allied coordination is required; JIEO will initiate the appropriate action.

32. TA97-069 (NO DLCP) - M.14 TADIL A Transmit Rules.

The USMC moved to approve this ICP as modified, and the USN seconded the motion. TADIL CCB 98-1 unanimously approved TA97-069 Ch1. Allied coordination is required; JIEO will initiate the appropriate action.

33. TA97-070 (NO DLCP) - DUI Definitions for DUIs 2652 and 2654.

The USMC moved to approve this ICP as modified, and the USN seconded the motion. TADIL CCB 98-1 unanimously approved TA97-070 Ch1. Allied coordination is required; JIEO will initiate the appropriate action.

34. TA97-071 (NO DLCP) - Simplification of W/ES (Harmonization #13)

TADIL CCB 98-1 deferred TA97-071 for staffing by the USN.

35. TA97-074 (NO DLCP) - Clarification of Alert Message Sequence.

a. The USN is preparing a new ICP for ID Conflict Resolution. Once that ICP is approved, the USA will withdraw this ICP.

b. TADIL CCB 98-1 deferred TJ97-074 Ch1 pending a new ICP from the USN.

Joint Multi-TADIL CCB 98-1 Minutes

36. TM97-075 (NO DLCP) - Definition of Receive.

TADIL CCB 98-1 deferred TM97-075 for staffing. This ICP will be discussed as part of the MIN IMP discussion item.

37. TM97-076 (NO DLCP) - Definition for Hostile.

- a. The USN evaluation stated that modifications were required for VMF to align it with the definition of hostile in STANAG 1241. JIEO stated that the definitions in the VMF TIDP-TE did align with STANAG 1241 with the exception of the term "track". Since the term "track" is not universally understood in the VMF community, it was replaced with the term "entity". The VMF community stated that it was willing to use the term "track" to promote interoperability. However, the change affects other definitions besides hostile, which would put it beyond the scope of this ICP, and require the development of a separate ICP. The CCB determined that this change should not be made at this time, and accepted the JIEO evaluation, which declassified the STANAG 5522 pages, as Change 1.
- b. The USMC moved to approve this ICP as modified, and the USN seconded the motion. TADIL CCB 98-1 unanimously approved TM97-076 Ch1. Allied coordination is required; JIEO will initiate the appropriate action.

38. TM97-077Ch1 (609/L16/US/M14) - J15.0 Changes

The USAF moved to approve this ICP as modified, and the USN seconded the motion. TADIL CCB 98-1 approved TM97-077 Ch2; the USA abstained. Allied coordination is required; JIEO will initiate the appropriate action.

39. TJ97-078 (NO DLCP) - J3.0 Update to Table 4.1-3.

- a. The USN recommended that Table 4.1-3 be deleted or the ICP withdrawn. The USAF stated that deleting the table was beyond the scope of the ICP and recommended that the USN submit a new ICP. The USN agreed.
- b. The USAF moved to approve this ICP as written, and the USMC seconded the motion. TADIL CCB 98-1 unanimously approved TJ97-078. Allied coordination is required; JIEO will initiate the appropriate action.

40. TJ97-079 (NO DLCP) - Points Data Update Request Response.

TADIL CCB 98-1 deferred TJ97-079 for staffing by the USN.

41. TJ97-080 (NO DLCP) - Change Data Order Lockout Exercise Exclusion.

TADIL CCB 98-1 deferred TJ97-080 for staffing by the USN.

Joint Multi-TADIL CCB 98-1 Minutes

42. TJ97-081 (NO DLCP) - Clear Emergency/Force Tell Indicator with J3.X Message.
- TADIL CCB 98-1 deferred TJ97-081 for staffing by the USN.
43. TJ97-082 (NO DLCP) - F-22 Addition to Specific Type.
- a. The JIEO evaluation, which added VMF TIDP-TE-TE and STANAG 5522 pages, was accepted as Change 1. The ICP was redesignated as TM97-082 Ch1.
 - b. The USN moved to approve this ICP as modified, and the USAF seconded the motion. TADIL CCB 98-1 unanimously approved TM97-082 Ch1. Allied coordination is required; JIEO will initiate the appropriate action.
44. TJ97-086 (NO DLCP) - PPLI IFF/SIF and PLAT/PLAT ACT MIN IMP Changes.
- a. The USA requested that Platform Activity be made optional. The USAF was reluctant to make the change if the USA was still going to vote no on the ICP and requested a straw vote. The results of the vote was 3 – 2 for approval of the ICP as written; the NSA, USAF, and USMC voted yes, the USA and USN voted no, and the CINC Bloc abstained. After reviewing the values for Land/Ground Platform Activity, the USAF agreed to making Platform Activity optional for the J2.5 and J2.6, provided the USMC and USA take an action to update the Land (Ground) Platform Activity data items to reflect meaningful values. The USA and USMC agreed.
 - b. The USAF moved to approve this ICP as modified, and the USMC seconded the motion. TADIL CCB 98-1 approved TJ97-086 Ch1 by a vote of 5-1; the USN voted no. Allied coordination is required; JIEO will initiate the appropriate action.
45. TA97-087 (NO DLCP) - Editorial Corrections to STANAG 5511.
- The USMC moved to approve this ICP as modified, and the USN seconded the motion. TADIL CCB 98-1 unanimously approved TA97-087 Ch1. Allied coordination is required; JIEO will initiate the appropriate action.
46. TM97-090 (015/L22/FR/M13, 598/L16/FR/M13) - Threat Warning Environment.
- The USMC moved to approve this ICP as written, and the USN seconded the motion. TADIL CCB 98-1 unanimously disapproved TM97-090. Allied coordination is required; JIEO will initiate the appropriate action.
47. TF97-091 (016/L22/SL/M13) - Mission Correlator Change Message.
- TADIL CCB 98-1 deferred TF97-091 for staffing by the USAF.

Joint Multi-TADIL CCB 98-1 Minutes

48. TF97-092 (017/L22/SL/M13) - FJ13 in Response to DUR.

The USN moved to approve this ICP as written, and the USMC seconded the motion. TADIL CCB 98-1 approved TF97-092; the USA abstained. Allied coordination is required; JIEO will initiate the appropriate action.

49. TF97-093 (018/L22/SL/M13/R1) - Link 22 Machine Receipt (MR) Protocols.

a. The USN evaluation provided a proposed Revision 2 for DLCP 018/L22/SL/M13/R1. The CCB accepted the USN evaluation as modified by the JIEO evaluation as Change 1. The USN is still staffing this ICP technically. The USN will submit any additional changes to SACLANT for submittal of a revised DLCP to the DLWG.

b. TADIL CCB 98-1 deferred TF97-093 Ch1 for staffing.

50. TJ97-094 (594/L16/UK/M13, 077/P16/UK/M14) - Active Electronic Decoys.

a. The CCB agreed that the UK DLCPS were incomplete. The USN recommended that this issue be added to the US-UK Bilateral agenda. The USAF and USN will provide questions raised at the CCB to the UK.

b. TADIL CCB 98-1 deferred TJ97-094 for staffing.

51. TJ97-095 (595/L16/UK/M13, 074/P16/UK/M13) - Retransmission of Surveillance Data.

a. The USAF stated that this ICP was a temporary solution to a larger problem shared by all systems. The CCB agreed to defer this ICP to the US-UK bilateral meeting.

b. TADIL CCB 98-1 deferred TJ97-095 for discussion at the US-UK Bilateral meeting.

52. TJ97-096 (596/L16/UK/M13) - J5.4 Transmit Rules.

The USN moved to approve this ICP as written, and the USMC seconded the motion. TADIL CCB 98-1 approved TJ97-096; the USAF abstained. Allied coordination is required; JIEO will initiate the appropriate action.

53. TJ97-097 (584/L16/FR/M12) - J10.2 WES (Tracking) Resulting from Reception of J12.6 Message.

The USMC moved to approve this ICP as written, and the CINC Bloc seconded the motion. TADIL CCB 98-1 unanimously disapproved TJ97-097. Allied coordination is required; JIEO will initiate the appropriate action.

Joint Multi-TADIL CCB 98-1 Minutes

54. TM97-098 (NO DLCP) - TN-1/Command Amplifier Field in the M.15.

The USMC moved to approve this ICP as modified, and the USN seconded the motion. TADIL CCB 98-1 unanimously approved TM97-098 Ch1. Allied coordination is required; JIEO will initiate the appropriate action.

55. TM97-099 (NO DLCP) - Environment/Category.

a. With the exception of one page, TA97-107 duplicates the TADIL A portion of TM97-099. The CCB agreed to add the TA97-107 page to this ICP and that JIEO should withdraw TA97-107.

b. The USN moved to approve this ICP as modified, and the USMC seconded the motion. TADIL CCB 98-1 unanimously approved TM97-099 Ch1. Allied coordination is required; JIEO will initiate the appropriate action.

56. TM97-100 (NO DLCP) - General/Specific Type - No Statement.

The USN moved to approve this ICP as modified, and the USMC seconded the motion. TADIL CCB 98-1 unanimously approved TM97-100 Ch1. Allied coordination is required; JIEO will initiate the appropriate action.

57. TA97-101 (NO DLCP) - M.0 Validation Code Explanation.

The USMC moved to approve this ICP as modified, and the USAF seconded the motion. TADIL CCB 98-1 unanimously approved TA97-101 Ch1. Allied coordination is required; JIEO will initiate the appropriate action.

58. TA97-102 (NO DLCP) - Unused DUIs in the Special Processing Indicator DFI.

The USN moved to approve this ICP as modified, and the USA seconded the motion. TADIL CCB 98-1 unanimously approved TA97-102 Ch1. Allied coordination is required; JIEO will initiate the appropriate action.

59. TA97-105 (NO DLCP) - DUIs with No Message Applicability.

The USA moved to approve this ICP as modified, and the USMC seconded the motion. TADIL CCB 98-1 unanimously approved TA97-105 Ch1. Allied coordination is required; JIEO will initiate the appropriate action.

60. TA97-106 (NO DLCP) - P/U Environment/Category DUI Name Change.

a. During the review of the ICP, it was determined that a change to STANAG 5616 would be required. MIL-STD-6016 is correct and does not require the change. JIEO will prepare the proper pages.

Joint Multi-TADIL CCB 98-1 Minutes

- b. The USN moved to approve this ICP as modified, and the USMC seconded the motion. TADIL CCB 98-1 unanimously approved TA97-106 Ch1. Allied coordination is required; JIEO will initiate the appropriate action.
- 61. TA97-107 (NO DLCP) - Environment/Category Editorial Correction.
 - a. With the exception of one page, this ICP duplicates the TADIL A portion of TM97-099. The CCB agreed to add the TA97-107 page to TM97-099, and that JIEO should withdraw this ICP.
 - b. JIEO withdrew TA97-107 at TADIL CCB 98-1; a CCBD will be issued.
- 62. TM97-108 (NO DLCP) - Collective Addressing of Pointers.

The USA moved to approve this ICP as written, and the CINC Bloc seconded the motion. TADIL CCB 98-1 disapproved TM97-108; the USN voted yes. Allied coordination is not required; JIEO will issue a CCBD.
- 63. TJ97-109 (NO DLCP) - J12.7 Engagements.

TADIL CCB 98-1 deferred TJ97-109 for staffing by the USAF.
- 64. TJ97-110 (NO DLCP) - J14.2 Minimum Implementation.

The USMC moved to approve this ICP as modified, and the USN seconded the motion. TADIL CCB 98-1 approved TJ97-110 Ch1 by a vote of 5-1; the NSA voted no. Allied coordination is required; JIEO will initiate the appropriate action.
- 65. TJ97-111 (NO DLCP) - Handling of M.11B Message from TADIL J.

The USMC moved to approve this ICP as modified, and the USN seconded the motion. TADIL CCB 98-1 unanimously approved TJ97-111 Ch1. Allied coordination is required; JIEO will initiate the appropriate action.
- 66. TA97-112 (NO DLCP) - "Weapons Type" Implementation Difference.

TADIL CCB 98-1 deferred TA97-112 Ch1 for staffing.
- 67. TA97-113 (NO DLCP) - Prohibit Transmission of Unknown Pending in CDO.

The USN moved to approve this ICP as modified, and the CINC Bloc seconded the motion. TADIL CCB 98-1 approved TA97-113 Ch1; the USA abstained. Allied coordination is required; JIEO will initiate the appropriate action.

Joint Multi-TADIL CCB 98-1 Minutes

68. TA97-114 (NO DLCP) - Periodic EW Updates for Moving Platforms.

- a. The USAF stated that despite previous agreements to the contrary this ICP added a new requirement to TADIL A in the E-3. The USN explained that the ICP was developed to allow its systems to send periodic updates without receiving trouble reports.
- b. The USN moved to approve this ICP as written, and the USMC seconded the motion. TADIL CCB 98-1 approved TA97-114; the USAF abstained. Allied coordination is required; JIEO will initiate the appropriate action.

69. TM97-115 (NO DLCP) - Weapons Status Fields in J13.3 Inadequate.

The USN moved to approve this ICP as modified, and the USMC seconded the motion. TADIL CCB 98-1 unanimously approved TM97-115 Ch1. Allied coordination is required; JIEO will initiate the appropriate action.

70. TJ97-116 (NO DLCP) - M.9F from J14.0 Translation.

The USN moved to approve this ICP as modified, and the USMC seconded the motion. TADIL CCB 98-1 unanimously approved TJ97-116 Ch1. Allied coordination is required; JIEO will initiate the appropriate action.

71. TJ97-117 (NO DLCP) - Retention of High Interest Track (HIT) During Correlation.

The USN moved to approve this ICP as modified, and the USMC seconded the motion. TADIL CCB 98-1 unanimously approved TJ97-117 Ch1. Allied coordination is required; JIEO will initiate the appropriate action.

72. TJ97-118 (NO DLCP) - Data Forwarding Filters Implementations.

- a. The USAF requested that the ICP be deferred pending resolution of the Exercise Filter Indicator issue with the UK.
- b. TADIL CCB 98-1 deferred TJ97-118 for staffing by the USAF.

73. TJ97-119 (NO DLCP) - J10.6 Minimum Implementation Changes.

The USN moved to approve this ICP as modified, and the USMC seconded the motion. TADIL CCB 98-1 unanimously approved TJ97-119 Ch1. Allied coordination is required; JIEO will initiate the appropriate action.

74. TJ97-120 (NO DLCP) - J3.0 Minimum Implementation by Point Type.

- a. The USN rewrote the ICP and requested that the CCB defer it as Change 1.

Joint Multi-TADIL CCB 98-1 Minutes

b. TADIL CCB 98-1 deferred TJ97-120 Ch1 for staffing.

75. TV97-121 (NO DLCP) - MAYDAY Message.

The USA moved to approve this ICP as modified, and the USN seconded the motion. TADIL CCB 98-1 approved TV97-121; the CINC Bloc and the NSA were absent. Allied coordination is not required; JIEO will issue a CCB.

76. TV97-122 (NO DLCP) - New Message, K07.N2 Medical Unit Situation Report.

The USA moved to approve this ICP as modified, and the USN seconded the motion. TADIL CCB 98-1 approved TV97-122 Ch1; the USAF abstained and the CINC Bloc and the NSA were absent. Allied coordination is not required; JIEO will issue a CCB.

77. TV97-123 (NO DLCP) - New Message, K07.N1 Mortuary Affairs Situation Report.

The USA moved to approve this ICP as modified, and the USMC seconded the motion. TADIL CCB 98-1 approved TV97-123 Ch1; the USAF abstained and the CINC Bloc and the NSA were absent. Allied coordination is not required; JIEO will issue a CCB.

78. TV97-124 (NO DLCP) - Modification to K07.4 Personnel Status.

The USA moved to approve this ICP as modified, and the USMC seconded the motion. TADIL CCB 98-1 approved TV97-124 Ch1; the USAF abstained and the CINC Bloc and the NSA were absent. Allied coordination is not required; JIEO will issue a CCB.

79. TV97-125 (NO DLCP) - Modification to DFI 4028 (ANGLE, MILS).

The USA moved to approve this ICP as modified, and the USMC seconded the motion. TADIL CCB 98-1 approved TV97-125 Ch1; the USAF abstained and the CINC Bloc and the NSA were absent. Allied coordination is not required; JIEO will issue a CCB.

80. TV97-126 (NO DLCP) - Deletion of DFI 4079 DUI 037 (Mutual Support Indicator).

The USA moved to approve this ICP as written, and the USN seconded the motion. TADIL CCB 98-1 approved TV97-126; the USAF abstained and the CINC Bloc and the NSA were absent. Allied coordination is not required; JIEO will issue a CCB.

81. TM97-127 (NO DLCP) - M.9E DUR for TN Associations.

The USN moved to approve this ICP as written, and the USMC seconded the motion. TADIL CCB 98-1 disapproved TM97-127 by a vote of 5-1; the USN voted yes. Allied coordination is not required; JIEO will issue a CCB.

Joint Multi-TADIL CCB 98-1 Minutes

82. TM97-128 (NO DLCP) - EW Control and Coordination Revision
TADIL CCB 98-1 deferred TM97-128 for staffing by the USAF.
83. TA97-129 (NO DLCP) - HAVCO Clarification.
The USMC moved to approve this ICP as modified, and the USN seconded the motion. TADIL CCB 98-1 unanimously approved TA97-129 Ch1. Allied coordination is required; JIEO will initiate the appropriate action.
84. TV97-130 (NO DLCP) - Modifications to K02.5 (Shell Report).
The USA moved to approve this ICP as modified, and the USMC seconded the motion. TADIL CCB 98-1 approved TV97-130 Ch1; the USAF abstained and the CINC Bloc and the NSA were absent. Allied coordination is not required; JIEO will issue a CCBD.
85. TV97-131 (NO DLCP) - Modification to K02.9 (Target Data).
The USA moved to approve this ICP as written, and the USN seconded the motion. TADIL CCB 98-1 approved TV97-131; the USAF abstained and the CINC Bloc and the NSA were absent. Allied coordination is not required; JIEO will issue a CCBD.
86. TV97-132 (NO DLCP) - Delete Special Consideration K02.14 (Message to Observer).
The USA moved to approve this ICP as modified, and the USMC seconded the motion. TADIL CCB 98-1 approved TV97-132 Ch1; the USAF abstained and the CINC Bloc and the NSA were absent. Allied coordination is not required; JIEO will issue a CCBD.
87. TV97-133 (NO DLCP) - Modification to K02.16 (End of Mission and Surveillance).
The USA moved to approve this ICP as modified, and the USMC seconded the motion. TADIL CCB 98-1 approved TV97-133 Ch1; the USAF abstained and the CINC Bloc and the NSA were absent. Allied coordination is not required; JIEO will issue a CCBD.
88. TV97-134 (NO DLCP) - Modification to K02.19 (Target Query/Standing Request for Information).
The USA moved to approve this ICP as written, and the USN seconded the motion. TADIL CCB 98-1 approved TV97-134; the USAF abstained and the NSA and the CINC Bloc were absent. Allied coordination is not required; JIEO will issue a CCBD.
89. TV97-135 (NO DLCP) - Modifications to K02.38 (Airborne Fire Mission).
The USA moved to approve this ICP as written, and the USMC seconded the motion. TADIL CCB 98-1 approved TV97-135; the USAF

Joint Multi-TADIL CCB 98-1 Minutes

abstained and the NSA and the CINC Bloc were absent. Allied coordination is not required; JIEO will issue a CCB.

90. TV97-136 (NO DLCP) - Inconsistencies in NBC Agent Type and Agent Persistency Type Field Usage.

The USA moved to approve this ICP as modified, and the USN seconded the motion. TADIL CCB 98-1 approved TV97-136 Ch1; the USAF abstained and the NSA and the CINC Bloc were absent. Allied coordination is not required; JIEO will issue a CCB.

91. TV97-137 (NO DLCP) - Modification to K02.4 (Call for Fire) and K02.8 (Schedule of Fires).

The USA moved to approve this ICP as modified, and the USMC seconded the motion. TADIL CCB 98-1 approved TV97-137 Ch1; the USAF abstained and the NSA and the CINC Bloc were absent. Allied coordination is not required; JIEO will issue a CCB.

92. TV97-138 (NO DLCP) - Revision of VMF TIDP-TE-TE Message Processing.

The USA moved to approve this ICP as modified, and the USMC seconded the motion. TADIL CCB 98-1 approved TV97-138 Ch1; the USAF abstained and the NSA and the CINC Bloc were absent. Allied coordination is not required; JIEO will issue a CCB.

93. TV97-139 (NO DLCP) - Emergency Resupply Request.

- a. This ICP is similar to TV97-140 and TV97-160 in that all three provide related, like-type logistics functionality. In reviewing the USA's TV97-160, the USMC could not determine how to identify if a needed supply item could be identified as a priority and to specify the exact material and quantity needed. The USA stated that it would be willing to add the appropriate fields to TV97-160 in order to respond to these USMC requirements. The USAF and the USN took the position that work was required to make the three messages common, but that it should happen. After discussion, the USA and USMC restated their positions that the messages covered by TV97-139, TV97-140, and TV97-160 satisfy different Information Exchange Requirements (IERS) and therefore can coexist in the message standard. See also the discussion for TV97-160.
- b. The USMC moved to approve this ICP as written, and the USN seconded the motion. The TADIL CCB 98-1 vote on TV97-139 was tied 1-1; the USAF voted no, and the USMC voted yes; the USA and USN abstained and the NSA and the CINC Bloc were absent. The CCB Chairman broke the tie by casting a no vote. TV97-139 was disapproved, allied coordination is not required; JIEO will issue a CCB.
- c. The USMC stated for the record that the USA and the USMC had again conferred regarding these messages. The USA

Joint Multi-TADIL CCB 98-1 Minutes

maintained its position that due to contractual requirements, it needed the message (TV97-160, Task Management) approved by the end of this CCB. The USA also noted that it did not vote against the USMC messages (it abstained). The USMC stated that it voted against the USA message because it did not meet its needs. The USMC further stated that this position was based on a meeting with a USA representative from Ft. Lee. In that meeting the USMC consensus was that the USA message could not meet the USMC requirements in its present form. JIEO stated that the issue of the presence of multiple messages in the standards covering like-type IERs raised serious enough concerns regarding information flow at the war fighter level that it would file a substantive appeal if the ICP was approved.

- d. After additional discussion, the USMC requested a re-vote on TV97-139, TV97-140, and TV97-160.
 - e. The USMC moved to approve this ICP as modified, and the USA seconded the motion. TADIL CCB 98-1 approved TV97-139 Ch1 by a vote of 2-1; the USAF voted no; the USN abstained and the NSA and the CINC Bloc were absent. JIEO declared this a substantive issue and will forward the ICP to the Standards Coordinating Committee (SCC). The CCBD will be held in abeyance pending resolution of the JIEO substantive.
94. TV97-140 (NO DLCP) - Emergency Resupply Request Response.
- a. See the discussions for TV97-139.
 - b. The USMC moved to approve this ICP as written, and the USN seconded the motion. The TADIL CCB 98-1 vote on TV97-140 was tied 1-1; the USAF voted no, and the USMC voted yes; the USA and USN abstained and the NSA and the CINC Bloc were absent. The CCB Chairman broke the tie by casting a no vote. TV97-140 was disapproved, allied coordination is not required; JIEO will issue a CCBD.
 - c. After additional discussion, the USMC requested a re-vote on TV97-139, TV97-140, and TV97-160.
 - d. The USMC moved to approve this ICP as modified, and the USA seconded the motion. TADIL CCB 98-1 approved TV97-140 Ch1 by a vote of 2-1; the USAF voted no; the USN abstained and the NSA and the CINC Bloc were absent. JIEO declared this a substantive issue and will forward the ICP to the SCC. The CCBD will be held in abeyance pending resolution of the JIEO substantive.
95. TV97-141 (NO DLCP) - Assault Support Request.
- a. The CCB accepted the USMC evaluation as Change 1.
 - b. TADIL CCB 98-1 deferred TV97-141 Ch1 for staffing by the USAF.

Joint Multi-TADIL CCB 98-1 Minutes

96. TM97-142 (NO DLCP) - Deletion of EW Tracks and Tracks of Unknown Environment/Category.

The USN moved to approve this ICP as modified, and the USMC seconded the motion. TADIL CCB 98-1 unanimously approved TM97-142 Ch1. Allied coordination is required; JIEO will initiate the appropriate action.

97. TJ97-143 (NO DLCP) - Target Position Quality (TPQ) to Track Quality (TQ) Mapping.

The USN moved to approve this ICP as modified, and the USMC seconded the motion. TADIL CCB 98-1 unanimously approved TJ97-143 Ch1. Allied coordination is required; JIEO will initiate the appropriate action.

98. TM97-144 (NO DLCP) - Identity Source.

TADIL CCB 98-1 deferred TM97-144 for staffing by the USN.

99. TJ97-145 (NO DLCP) - TADIL J Priority Message Scheme.

TADIL CCB 98-1 deferred TJ97-145 for staffing by the USA.

100. TJ97-146 (NO DLCP) - Exchange of Non-Command and Control (NON-C²) Identification Friend or Foe (IFF) Data.

The USN withdrew TJ97-146 at TADIL CCB 98-1. Allied coordination is not required; JIEO will issue a CCBD.

101. TJ97-147 (NO DLCP) - MIL-STD-6016 Incorporation Errors.

The CINC Bloc moved to approve this ICP as written, and the USMC seconded the motion. TADIL CCB 98-1 unanimously approved TJ97-147. Allied coordination is required; JIEO will initiate the appropriate action.

102. TV97-148 (NO DLCP) - ELINT Description Message.

The USN moved to approve this ICP as modified, and the USAF seconded the motion. TADIL CCB 98-1 approved TV97-148 Ch1; the USAF abstained and the NSA and the CINC Bloc were absent. Allied coordination is not required; JIEO will issue a CCBD.

103. TV97-149 (NO DLCP) - ELINT Evaluation Message.

The USN moved to approve this ICP as modified, and the USAF seconded the motion. TADIL CCB 98-1 approved TV97-149 Ch1; the USAF abstained and the NSA and the CINC Bloc were absent. Allied coordination is not required; JIEO will issue a CCBD.

104. TV97-150 (NO DLCP) - ROTH Tasking/Report Messages.

The USN moved to approve this ICP as modified, and the USMC seconded the motion. TADIL CCB 98-1 approved TV97-150 Ch1; the

Joint Multi-TADIL CCB 98-1 Minutes

USA and USAF abstained and the NSA and the CINC Bloc were absent. Allied coordination is not required; JIEO will issue a CCBD.

105. TV97-151 (NO DLCP) - 4-WHISKEY Message.

The USN moved to approve this ICP as modified, and the USMC seconded the motion. TADIL CCB 98-1 approved TV97-151 Ch1; the NSA and the CINC Bloc were absent. Allied coordination is not required; JIEO will issue a CCBD.

106. TV97-152 (NO DLCP) - Unit Reference Number (URN) DUI Name Modification.

The USN moved to approve this ICP as modified, and the USA seconded the motion. TADIL CCB 98-1 approved TV97-152 Ch1; the USAF abstained and the NSA and the CINC Bloc were absent. Allied coordination is not required; JIEO will issue a CCBD.

107. TM97-153 (NO DLCP) - DATUM Reporting.

The USN moved to approve this ICP as modified, and the USMC seconded the motion. TADIL CCB 98-1 approved TM97-153 Ch1 by a vote of 5-1; the USAF voted no. Allied coordination is required; JIEO will initiate the appropriate action.

108. TM97-154 (NO DLCP) - Acoustic Bearing Origins.

The USN moved to approve this ICP as modified, and the USMC seconded the motion. TADIL CCB 98-1 approved TJ97-154 Ch1; the USAF abstained. Allied coordination is required; JIEO will initiate the appropriate action.

109. TM97-155 (NO DLCP) - Updating of Air Specific Types.

The USN moved to approve this ICP as modified, and the USMC seconded the motion. TADIL CCB 98-1 unanimously approved TM97-155 Ch1. Allied coordination is required; JIEO will initiate the appropriate action.

110. TM97-156 (NO DLCP) - Updating of the Type Stores.

The USN moved to approve this ICP as written, and the CINC Bloc seconded the motion. TADIL CCB 98-1 unanimously approved TM97-156. Allied coordination is required; JIEO will initiate the appropriate action.

111. TM97-157 (NO DLCP) - Surface-to-Air (SAM) Missile Types.

- a. This ICP was discussed in conjunction with TM97-155. The two ICPS were in conflict because both assigned values to the same range of Data Items (DIs). The block of DIs assigned by this ICP was modified to remove the conflict. A member of the VMF community asked if the VMF change pages contained in this ICP could be incorporated into the next reissue of the VMF TIDP-TE-TE-TE. JIEO stated that since

Joint Multi-TADIL CCB 98-1 Minutes

the changes proposed for the other standards required allied coordination, all portions of the ICP must wait until the coordination is completed. The CCB reviewed and accepted the modified JIEO evaluation as Change 1.

- b. The USMC moved to approve this ICP as modified, and the USN seconded the motion. TADIL CCB 98-1 unanimously approved TM97-157 Ch1. Allied coordination is required; JIEO will initiate the appropriate action.

112. TV97-158 (NO DLCP) - New Message, K05.N5 Laser Warning.

The USA moved to approve this ICP as modified, and the USMC seconded the motion. TADIL CCB 98-1 approved TV97-158 Ch1; the USAF abstained and the NSA and the CINC Bloc were absent. Allied coordination is not required; JIEO will issue a CCBd.

113. TV97-159 (NO DLCP) - New Message, K07.N3 Supply Point Status Report.

The USA moved to approve this ICP as modified, and the USMC seconded the motion. TADIL CCB 98-1 approved TV97-159 Ch1; the USAF abstained and the NSA and the CINC Bloc were absent. Allied coordination is not required; JIEO will issue a CCBd.

114. TV97-160 (NO DLCP) - Task Management.

- a. See discussion for TV97-139
- b. The USA moved to approve this ICP as written, and the USN seconded the motion. The TADIL CCB 98-1 vote on TV97-160 was for disapproval 2-1; the USA voted yes; the USN abstained and the NSA and the CINC Bloc were absent. Allied coordination is not required; JIEO will issue a CCBd.
- c. The USA declared that it was going to file a substantive appeal. As a result of a meeting between the appropriate USA and USMC personnel, the USA and USMC agreed that the three logistics messages (TV97-139, TV97-140, and TV97-160) covered distinctly different IERs. JIEO and the USN strongly disagreed with the USMC and USA positions, stating that the three messages should be combined into a single message. JIEO stated that the issue of the presence of multiple messages in the standards covering like-type IERs raised serious enough concerns regarding information flow at the war fighter level that it would file a substantive appeal if the ICP was approved. The USAF agreed with JIEO and the USN, but would not block the messages. After additional discussion, the USA requested a re-vote on this message.
- d. The USA moved to approve this ICP as modified, and the USMC seconded the motion. TADIL CCB 98-1 approved TV97-160 Ch1 by a vote of 2-1; the USAF voted no; the USN abstained and the NSA and the CINC Bloc were absent. JIEO declared this a

Joint Multi-TADIL CCB 98-1 Minutes

substantive issue and will forward the ICP to the SCC. The CCBD will be held in abeyance pending resolution of the JIEO substantive.

115. TV97-161 (NO DLCP) - Index Numbering.

The USA moved to approve this ICP as modified, and the USN seconded the motion. TADIL CCB 98-1 approved TV97-161 Ch1; the USAF abstained and the NSA and the CINC Bloc were absent. Allied coordination is not required; JIEO will issue a CCBD.

116. TV97-162 (NO DLCP) - Modification to Medical Evacuation Request Message K07.1.

The USA moved to approve this ICP as modified, and the USN seconded the motion. TADIL CCB 98-1 approved TV97-161 Ch1; the USAF abstained and the NSA and the CINC Bloc were absent. Allied coordination is not required; JIEO will issue a CCBD.

117. TV97-163 (NO DLCP) - GEOREFERENCE ID.

The USA moved to approve this ICP as modified, and the USN seconded the motion. TADIL CCB 98-1 approved TV97-163 Ch1; the USAF abstained and the NSA and the CINC Bloc were absent. Allied coordination is not required; JIEO will issue a CCBD.

118. TV97-164 (NO DLCP) - GEOREFERENCE Data Message.

- a. The CCB reviewed and accepted the USA evaluation as Change 1. The ICP title was changed to "Entity Data Message."
- b. The USA moved to approve this ICP as modified, and the USN seconded the motion. TADIL CCB 98-1 approved TV97-167 Ch1; the USAF abstained and the NSA and the CINC Bloc were absent. Allied coordination is not required; JIEO will issue a CCBD.

119. TV97-165 (NO DLCP) - Modifications to K05.1 Position Report.

The USA moved to approve this ICP as modified, and the USN seconded the motion. TADIL CCB 98-1 approved TV97-165 Ch1; the USAF abstained and the NSA and the CINC Bloc were absent. Allied coordination is not required; JIEO will issue a CCBD.

120. TV97-166 (NO DLCP) - Basic Wind Report Modification.

The USA moved to approve this ICP as modified, and the USMC seconded the motion. TADIL CCB 98-1 approved TV97-166 Ch1; the USAF abstained and the NSA and the CINC Bloc were absent. Allied coordination is not required; JIEO will issue a CCBD.

Joint Multi-TADIL CCB 98-1 Minutes

121. TV97-167 (NO DLCP) - Enhanced Fiber-Optic Guided Missile (EFOGM) Messages.

The USA moved to approve this ICP as modified, and the USN seconded the motion. TADIL CCB 98-1 approved TV97-167 Ch1; the USAF abstained and the NSA and the CINC Bloc were absent. Allied coordination is not required; JIEO will issue a CCBd.

122. TV97-168 (NO DLCP) - Network Monitoring Message.

- a. The USA provided change pages based on comments received at the VMF SG. The USN questioned the use of using uniquely named DUIs. The USA stated that the many kinds of information contained in the Resolution/Coding field of the DED made it difficult to determine usage of a DUI, thus the use of unique DUI names. The USA stated that, while this was not the only way, it was the easiest way to provide clarity to system implementers. JIEO expressed the same concern as the USN and stated that JIEO has an ongoing effort regarding the common DED to eliminate overlapping entries in the DED. JIEO will probably be submitting ICPS in the future to delete overlapping DUIs.
- b. This is a Common Message Parser (and other database implementation) issue. The parser creates a flat file database that does not include the Resolution/Coding information from the DED. The implementors only get the DFI/DUI name and with multiple identical names, the parser doesn't know how to parse the message. The USA sees the use of unique DUI names similar to the use of aliases as allowed in the C2Core effort. The USA is trying to standardize the database information going to various implementors to eliminate the probability that each implementor doing it differently. JIEO stated that this problem goes back to the initial implementation by the USAF and USMC of TADIL J when they had to explain, in detail, what each field in each message meant. The USN stated that it had similar problems, which lead to the development of their Operational Specifications. The USAF noted that the USA indicated that this ICP was only a partial solution to its problem. The USAF stated that it would prefer to see a complete solution.
- c. The USA requested a straw vote on this ICP. The USA and USMC supported the ICP; the USN, USAF, and JIEO did not support the ICP; the CINC Bloc and NSA were absent. The USA agreed to accept the change to generic URN names.
- d. The USA moved to approve this ICP as modified, and the USN seconded the motion. TADIL CCB 98-1 approved TV97-168 Ch1; the NSA and the CINC Bloc were absent. Allied coordination is not required; JIEO will issue a CCBd.

Joint Multi-TADIL CCB 98-1 Minutes

123. TV97-169 (NO DLCP) - New Message, K01.N2 System Coordination.

- a. JIEO stated that previous decisions regarding the format of the data in the various standards were not documented and the VMF SG decided that all such formatting decisions would be documented and if necessary forwarded to either the JMSWG or CCB as appropriate. JIEO and the USN stated that they believed, based on the TV97-168 and TV97-169, the use of uniquely named DFI/DUIs would be severely limited. An ICP to remove unique DFI/DUI names should be submitted, but no service was willing to give it a high priority and such a change would have a negative impact on fire support implementation which is tightly linked to legacy systems.
- b. The USA moved to approve this ICP as modified, and the USN seconded the motion. TADIL CCB 98-1 approved TV97-169; the NSA and the CINC Bloc were absent. Allied coordination is not required; JIEO will issue a CCBD.

124. TV97-170 (NO DLCP) - Alignment of Icon DFIs, DUIs, and Related Fields with MIL-STD-2525A.

The USA moved to approve this ICP as modified, and the USN seconded the motion. TADIL CCB 98-1 approved TV97-170 Ch1; the USAF abstained and the NSA and the CINC Bloc were absent. Allied coordination is not required; JIEO will issue a CCBD.

125. TJ97-171 (599/L16/UK/M14, 081/5616/UK/M14) - Cancellation of EWACS 28 and 29.

TADIL CCB 98-1 deferred TJ97-171 for staffing by the USAF.

126. TV97-172 (NO DLCP) - Fire Support Package Two, Technical and Editorial Corrections.

The USA moved to approve this ICP as modified, and the USMC seconded the motion. TADIL CCB 98-1 approved TV97-172 Ch1; the USAF abstained and the NSA and the CINC Bloc were absent. Allied coordination is not required; JIEO will issue a CCBD.

127. TV97-173 (NO DLCP) - Inflight Sighting Report.

- a. The USMC moved to approve this ICP as modified, and the USN seconded the motion. The TADIL CCB 98-1 vote on TV97-173 Ch1 was tied 2-2; the USA and USMC voted yes; the USAF and USN voted no; the NSA and the CINC Bloc were absent. The CCB Chairman broke the tie by casting a no vote. TV97-173 was disapproved. Allied coordination is not required; JIEO will issue a CCBD.
- b. The USMC requested to know the reason for JIEO voting no. Citing the several contact reporting messages contained in the VMF message standard JIEO explained that, overall, it was against the proliferation of similar messages. This was

Joint Multi-TADIL CCB 98-1 Minutes

consistent with the reasons for JIEO voting no on the other VMF ICPS on which JIEO got to vote.

128. TV97-174 (NO DLCP) - ELINT Event Message.

The USN moved to approve this ICP as modified, and the USMC seconded the motion. TADIL CCB 98-1 approved TV97-174 Ch1; the USAF abstained and the NSA and the CINC Bloc were absent. Allied coordination is not required; JIEO will issue a CCBD.

129. TV97-175 (NO DLCP) - Screen KILO Message.

The USN moved to approve this ICP as modified, and the USMC seconded the motion. TADIL CCB 98-1 approved TV97-175 Ch1; the NSA and the CINC Bloc were absent. Allied coordination is not required; JIEO will issue a CCBD.

130. TJ97-176 (NO DLCP) - Joint Network Design Guide (JNDG).

TADIL CCB 98-1 deferred TJ97-176 for staffing by the USN.

131. TM97-177 (NO DLCP) - NONR²-to-R² IFF/SIF Difference Resolution.

TADIL CCB 98-1 deferred TM97-177 for staffing by the USAF.

132. TJ97-181 (612/L16/UK/M14) - Correction of DFI/DUI 1803/003.

The USMC moved to approve this ICP as modified, and the CINC Bloc seconded the motion. TADIL CCB 98-1 unanimously approved TJ97-181 Ch1. Allied coordination is required; JIEO will initiate the appropriate action.

133. TJ97-182 (079/P16/UK/M14) - NATO Network Request Form.

The CINC Bloc moved to approve this ICP as written, and the USAF seconded the motion. TADIL CCB 98-1 unanimously approved TJ97-182. Allied coordination has been completed; JIEO will issue a CCBD.

134. TJ97-183 (078/P16/UK/M14) - Broadcast Cease Fire.

The USA moved to approve this ICP as written, and the USN seconded the motion. TADIL CCB 98-1 unanimously approved TJ97-183. Allied coordination has been completed; JIEO will issue a CCBD.

135. TS97-184 (019/5601/UK/M14) - Correction of Link 11 Identity to Link 14 Amplification Conversion Table.

The USN moved to approve this ICP as written, and the USMC seconded the motion. TADIL CCB 98-1 approved TS97-184 by a vote of 5-0; the USAF abstained. Allied coordination has been completed; JIEO will issue a CCBD.

Joint Multi-TADIL CCB 98-1 Minutes

136. TJ97-186 (NO DLCP) - Platform/Platform Activity and Space Specific Type Reporting.
- a. The USAF questioned whether systems would accept multiple copies of the last Extension word of a sequence, i.e., J6.0I, J6.0E0, J6.0E1, J6.0E1. Such a sequence is permitted in MIL-STD-6016. The C/S/As took an action to check if their systems accept the above sequence.
 - b. The CINC Bloc moved to approve this ICP as modified, and the NSA seconded the motion. TADIL CCB 98-1 unanimously approved TJ97-189 Ch1. Allied coordination is required; JIEO will initiate the appropriate action.
137. TJ97-189 (NO DLCP) - Rename Mission Correlator, 2 Field in the J2.2C5 Word.

The USN moved to approve this ICP as modified, and the USMC seconded the motion. TADIL CCB 98-1 approved TJ97-189 Ch1; the USA abstained. Allied coordination is required; JIEO will initiate the appropriate action.

K. 1998 ICPS

- 1. TA98-007 (121/L11/NO/M14) - Implement NATO Free-Format Text Message on Link 11 and Link 11B, Including Forwarding Between Link 11 and Link 11B.
 - a. The CCB incorporated the Norwegian comments contained in this ICP into TA93-102 Ch3 (see paragraph G.9).
 - b. JIEO withdrew TA98-007 at TADIL CCB 98-1 and will issue a CCBD.
- 2. TV98-010 (NO DLCP) - Modification to DFI 757 (Range).
 - a. This ICP was given the precedence of urgent to ensure that this ICP would be voted on at this CCB and, if approved, included in the next reissue of the VMF TIDP-TE. The USAF stated that it did not disagree with the validity of the ICP. However, it would vote no because it objected to the misuse of the urgent precedence.
 - b. The USA moved to approve this ICP as modified, and the USMC seconded the motion. TADIL CCB 98-1 approved TV98-010 Ch1 by a vote of 3-1; the USAF voted no; the NSA and the CINC Bloc were absent. Allied coordination is not required; JIEO will issue a CCBD.
- 3. TV98-011 (NO DLCP) - Modification to DFI 4002/001 (Method of Engagement).
 - a. See the discussion in paragraph K.3.

Joint Multi-TADIL CCB 98-1 Minutes

- b. The USA moved to approve this ICP as modified, and the USMC seconded the motion. TADIL CCB 98-1 approved TV98-011 Ch1 by a vote of 3-1; the USAF voted no; the NSA and the CINC Bloc were absent. Allied coordination is not required; JIEO will issue a CCB.
- 4. TV98-012 (NO DLCP) - Deletion of DFI 4016 (Global Octant).
 - a. See the discussion in paragraph K.3.
 - b. The USA moved to approve this ICP as modified, and the USN seconded the motion. TADIL CCB 98-1 approved TV98-012 Ch1 by a vote of 3-1; the USAF voted no; the NSA and the CINC Bloc were absent. Allied coordination is not required; JIEO will issue a CCB.
- 5. TJ98-013 (NO DLCP) - MIL-STD-6016 Incorporation Errors - 2

The USAF moved to approve this ICP as modified, and the USN seconded the motion. TADIL CCB 98-1 approved TJ98-013 Ch1; the USA abstained. Allied coordination is required; JIEO will initiate the appropriate action.
- 6. TJ98-014 (NO DLCP) - Deletion of Ch3 Requirement with Cease Do Not Drop.

The USAF moved to approve this ICP as modified, and the USN seconded the motion. TADIL CCB 98-1 approved TJ98-014 Ch1; the NSA and the CINC Bloc were absent. Allied coordination is required; JIEO will initiate the appropriate action.

L. ACTION ITEMS

- 1. AI95-3/1 - JIEO is to determine the effort required to show multiple data link usage for a particular Data Field Identifier/Data Use Identifier (DFI/DUI).

JIEO presented a discussion paper for the C/S/As to review prior to TADIL CCB 98-2. Open.
- 2. AI97-1/3 - The C/S/As are to restaff the J7.6 capabilities and determine what filters they required operationally and why.

Closed.
- 3. AI97-1/5 JIEO to develop an ICP to remove the variable parameters from MIL-STD-6016.

Open.

Joint Multi-TADIL CCB 98-1 Minutes

4. AI97-2/1 - The C/S/As are to staff the Multiple Word Sequence paper submitted by the UK.
 - a. The USAF and USN provided responses to the UK at the last US-UK Bilateral meeting. The USMC and USA were tasked to provide input, information to all C/S/As by 4/1/98.
 - b. Open
5. AI97-3/1 - The USN accepted an action to submit a new ICP to resolve problems beyond the scope of TJ93-054.

Open.
6. AI98-1/1. C/S/As to provide to JIEO information regarding how much support each C/S/As could provide in converting the standards to Word 97, and where the support could be provided, by 2/13/98.
7. AI98-1/2. JIEO to provide standardized procedures for the handling of automated implementation updates by 2/26/98 (30 days).
8. AI98-1/3. The USN/PMW-159 shall review STANAG 4175, Edition 2, Annexes A and B (excluding the NATO SECRET Supplement), to determine if the US could recommend that the DLWG take action to declassify the NATO CONFIDENTIAL portion of the STANAG. The USN/PMW 159 should report their findings at CCB 98-2.
9. AI98-1/4. USMC and USA to update the Land (Ground) Platform Activity data items to reflect meaningful values.
10. AI98-1/5. The C/S/As to check if their systems actually processed multiple Extension Words in accordance with MIL-STD-6016.
11. AI98-1/6. JIEO to determine if, how, and when the CDBS database and generated reports could be partitioned to support new classified information.

M. DISCUSSION ITEMS

1. Discuss USAF Issue Paper on Establishment of VMF Proprietary Messages.

This paper was discussed at the JMSWG (see JMSWG 98-1 minutes).
2. Discuss JITC Paper listing Air Control Revision Discrepancies/Inconsistencies.
 - a. The USAF stated that the JITC paper provides a list of problems with Air Control Revisions (ACR). The problems researched by the USAF are valid problems. The source of the problems was the development of the test plan at JITC.

Joint Multi-TADIL CCB 98-1 Minutes

The USAF expressed concern that the JITC paper may not identify all the problems in the ACR ICP.

- b. The USMC volunteered to put together a first cut ICP to resolve the problems. JIEO will inform JITC, as a first step, to ignore the state tables in the ICP.
- 3. Discuss CM of Classified TADIL J/Link 16 Messages.

This problem arises because both the USAF and USN are preparing classified TADIL J messages, which cannot be contained in the existing TADIL J message structure. The messages will be labeled using a US proprietary message label. The messages will be structured according to TADIL J protocols but packaged differently. The USN questioned how the data items contained in the proprietary messages would be related to the existing TADIL J DED. The USAF stated that while some DIs were unclassified, some would be classified. JIEO pointed out that if the data items were merged with the existing DED, it would limit the ability to put MIL-STD-6016 on the Web. The ability to segment this information within the CDBS database is being studied to determine if the information can be maintained in the CDBS database and still print an unclassified DED. JIEO took an action to determine if, how, and when the database and reports could be partitioned. The CCB agreed that the ICP would contain message description and field coding, but not DED pages.

- 4. Discuss USN Draft Briefing for TM95-039Ch6 (099/L11/US/M11, 073/5616/US/M11) - Ballistic Missile Defense (TADIL A/B), to be presented at the 15th DLWG.
 - a. The USAF requested that the DLCP be withdrawn in NATO. The USAF would prefer that TMD be performed on TADIL J only and not on TADIL A. Only situational awareness would be provided on TADIL A (the subject of an approved ICP to be submitted to the 15th DLWG), which would not require any changes to that standard.
 - b. The USAF recommended that the DLCP be withdrawn and the ICP be changed to Allied Coordination Not Required. The USAF made the motion and the USMC seconded. The C/S/As voted as follows; the USAF, NSA, USMC, CINC Bloc, and USA voted Yes; the USN voted No. Since the DLCP will be withdrawn, no briefing will be provided.
 - c. The USN stated that the USN Theater Air Defense Community strongly desired that the Link 11/Link 16 combined TMD combined operations be available in NATO. The USN would have to consult with the theater commanders and could go substantive depending on the results of the consultations.
- 5. Discuss 4 Draft USAF ICPS.
 - a. The USAF has an urgent need to get these ICPS under contract prior to CCB 98-2. The USAF is looking for input from the

Joint Multi-TADIL CCB 98-1 Minutes

C/S/As as to the probability that the ICPS will be approved with little or no change at CCB 98-2. The ICPS have been coordinated with the USN F/A-18 community. The CCB performed a quick review of the ICPS and no significant objections were voiced.

- b. The USAF stated that these ICPS would be submitted to CCB 98-2 as Priority ICPS and requested that if any C/S/A found a significant problem with the ICPS, they notify the USAF as soon as possible.
6. USN to lead discussion on MIN IMP.
- a. The USN expressed concerns that there are differences between the codes used in Link 22 and those used for Link 16. Additionally, some information contained in the Link 16 MIN IMP is not logical down at the data item level. The USN recommended that the CCB use the USN's J3.0 MIN IMP ICP as a basis for developing an overall updating of the MIN IMP tables. The USN also recommended that this process be the task of a working group of the CCB. The USN suggestion was a working group with a limited duration; a relatively few number of meetings, and only one or two representatives per C/S/A, with JIEO as the chairperson. The USAF recommended that the UK be invited due to the significant amount of input received from the UK for the current MIN IMP tables and the CCB agreed.
 - b. The first meeting will be held the week of 3/16/98 at NCTSI in San Diego. The name of the group will be the Implementation Working Group. The USN agreed to chair the meeting and provide the secretariat if JIEO is unable to support the travel.
7. J12.6 Split by Environmental/Category
- a. The root problem is that because of the Air Support Operations ICP, no room for future growth is available within the Status Information Discretes (SIDs). By splitting the SIDs based on Environment/Category (E/C), ample room for expansion is created to support new requirements for Space and other environments.
 - b. This issue will be discussed at the US-UK Bilateral meeting and the USAF will submit an ICP reflecting those discussions.
8. Use of Environment/Category in relation to J3.0C5.

Currently, only two E/C values are used in the J3.0C5 word. The USAF wanted to know if there were other implementations other than Friendly Weapon Danger Area and TMD or could the E/C values be used to determine if the C5 word should be processed. The USN stated the only use was to indicate how to interpret the Point Amp

Joint Multi-TADIL CCB 98-1 Minutes

field. No objection was voiced to processing the C5 word based on the E/C value.

9. Transmission of Automatic Data Update Request Upon Entering Net.

Currently, all USN platforms have had Trouble Reports which were administratively closed by JITC without clearing the problem. The USN stated that this has happened multiple times. The CCB requested that JIEO send a message to JITC requesting that the Joint Analysis Review Panel not clear trouble reports regarding message standard issues without coordinating with the TADIL CCB.

N. ADJOURNMENT

The Chairman adjourned Multi-TADIL CCB 98-1 at 1730 on 3 February 1998.
